Ok, thanks Pat. I wasn't sure if this one was associated with some of the other 308 orders that have been or will be sent out.

Paul – Not sure if anyone discussed this particular inspection with you. We instruct our inspectors to provide the state prior notice. It looks like that happened. As you recall, there is a new National Enforcement Initiative that covers a number of industrial sectors including mines. We expect to conduct inspections at a number of facilities under the NEI sectors in the coming years. Sometimes we ask NEIC to help. I don't know specifically why this facility is being inspected. We usually look at size, proximity to impaired waters, history etc. when selecting a site. I hope you can send an inspector along. NEIC usually does a good job. Let me know if we need to discuss anything.

Pat –

Our inspector received the below email concerning an upcoming EPA inspection (6 days prior to the inspection date). I don't recall hearing about this one. Had we discussed it before? What is the reason for the inspection at this particular facility?

Thanks.

Holly,

To follow up on my phone call, EPA is doing an inspection at the Carlisle Mine in Sullivan County next week. We plan to start the inspection on Tuesday (June 7th) morning, I don't know the exact time yet, I will let you know on Monday. Attached is a letter announcing the inspection. I can be reached at telephone number below. It is my desk number, but it also rings through to my cell phone so you will be able to reach at that number when I am not in the field.

Look forward to meeting you.
